

TPP and Korea's choice

2015. 10. 13

Chan Kwon Bae
Young gui Kim

1 Overview of TPP

Korea Institute for International Economic Policy

➤ **What is Trans-Pacific Partnership (TPP) ?**

- The **TPP** is a proposed trade agreement between **twelve Pacific Rim countries** concerning **a variety of matters of economic policy**
- Member countries: Brunei, Chile, New Zealand, Singapore, Australia, Canada, Japan, Malaysia, Mexico, Peru, the United States, and Vietnam
- This agreement was reached on **5 October 2015** after 5 years of negotiations.
- Among other things, the TPP seeks to **lower trade barriers such as tariffs**

➤ **Potential participants of TPP (PTPP)**

- **South Korea** showed interest in entering the TPP, but did not join yet. Due to her high trade dependency, Korea will take part in the second wave of TPP.
- Other countries and regions interested in TPP membership include **Taiwan, Thailand**, and so on.
- **China** is not likely to join the negotiation at this moment. However, if FTAAP (China supports) would be established by enlargement of TPP, we can regard this case as China's joining TPP

1 Potential impacts of TPP

Korea Institute for International Economic Policy

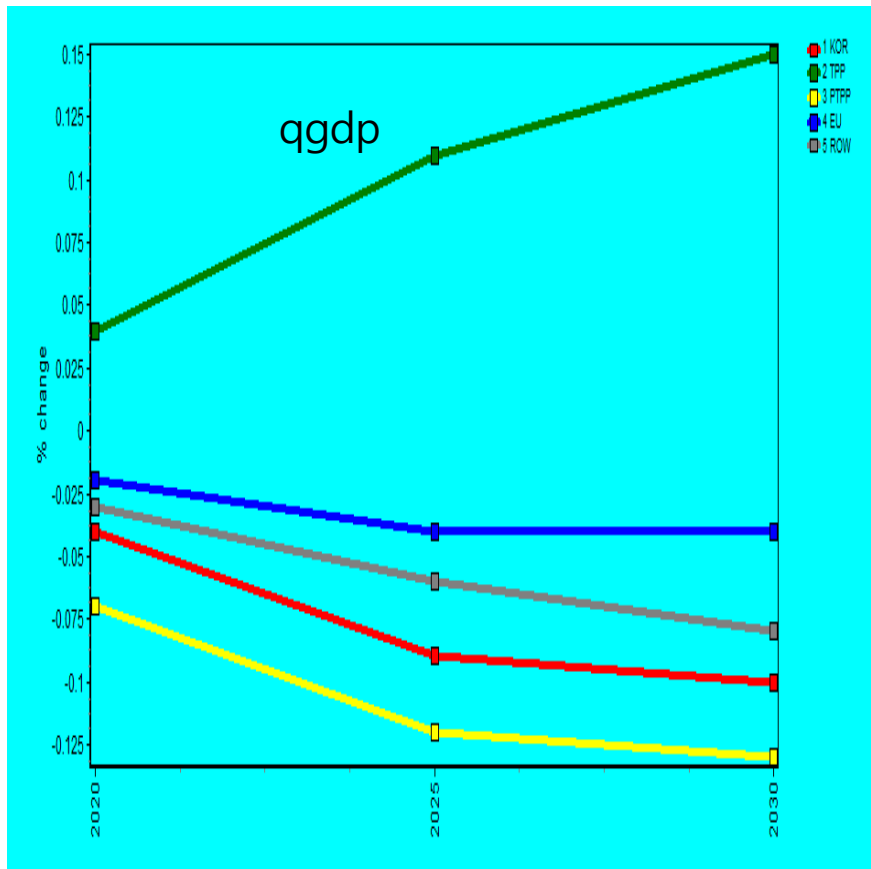

➤ Simulation design

- Dynamic GTAP database: V8.1 (reference year of 2004)
 - 5 regions: KOR(kor), TPP(Aus, Nzl, Jpn, Mys, Sgp, Vnm, Can, Usa, Mex, Chl, Per), PTPP(Chn, Twn, Tha), EU, ROW
 - 2 sectors: GOODS, SVC
 - 4 endowments: Sklab, UnSklab, capital, land
 - 5 periods: 2004~2010, 2011~15, 2016~20, 2021~25, 2025~2030
- Projections for world CGE Model baselines by Chappuis and Walmsley (2011)
 - GDP, population, skilled labor, and unskilled labor (CEPII)
- Base
 - **swap** qgdp = afereg ;
 - **Shock** <year> qfactsup("UnSklab",REG) = **select from file** tot.har **header** "GROW" ;
 - **Shock** <year> qfactsup("SkLab",REG)= **select from file** tot.har **header** "GROW" ;
 - **Shock** <year> pop = **select from file** pop.har **header** "GROW" ;
 - **shock** <year> qgdp = **select from file** gdp.har **header** "GROW" ;
- Policy 1 (2016~2020)
 - **tshock** tms("GOODS","TPP","TPP") = **select from file** taxshb.har **header** "RTMS" ;

1 Potential impacts of TPP

Korea Institute for International Economic Policy

- TPP members can expect positive economic growth
- Elimination of tariffs among TPP \Rightarrow more production \Rightarrow demand for capital \uparrow
 \Rightarrow rental and ROR \uparrow \Rightarrow more investment (investment inflow from global Trust)

TPP	2020	2025	2030
qcgds	0.8	0.75	0.57
qk	0.1	0.29	0.39
rental	0.48	0.29	0.15
rorge	0.07	0.08	0.03
rorga	0.19	0.07	0

TPP	2020	2025	2030
wqh	0.25	0.21	0.18
wqhf	0.31	0.36	0.38
wqht	-0.03	-0.39	-0.59
wqtf	1.68	3.41	4.32

Note: all variables are evaluated based on difference between Policy and Base

II Korea's choice

Korea Institute for International Economic Policy

- **Which one is better? becoming a first mover vs joining together but later**
 - Joining solely: benefit the fruits early but pays high entry costs
 - Joining together (with china): takes time but expects more bargaining power

- **Simulation design**
 - Same database and business-as-usual scenarios
 - Base
 - **swap** qgdp = afereg ;
 - **Shock** <year> qfactsup("UnSkLab",REG) = **select from file** tot.har **header** "GROW" ;
 - **Shock** <year> qfactsup("SkLab",REG)= **select from file** tot.har **header** "GROW" ;
 - **Shock** <year> pop = **select from file** pop.har **header** "GROW" ;
 - **shock** <year> qgdp = **select from file** gdp.har **header** "GROW" ;
 - **shock** tms("GOODS","TPP","TPP") = **select from file** taxshb.har **header** "RTMS" ;
 - Policy 2 (2016~2020)
 - **tshock** tms("GOODS","KOR","TPP") = **select from file** taxshp.har **header** "RTMS" ;
 - **tshock** tms("GOODS","TPP","KOR") = **select from file** taxshp.har **header** "RTMS" ;
 - Policy 3 (2021~2025)
 - **tshock** tms("GOODS","KOR","TPP") = **select from file** taxshp.har **header** "RTMS" ;
 - **tshock** tms("GOODS","TPP","KOR") = **select from file** taxshp.har **header** "RTMS" ;
 - **tshock** tms("GOODS","PTPP","TPP") = **select from file** taxshp.har **header** "RTMS" ;
 -

II Korea's choice

Korea Institute for International Economic Policy

- Joining together will bring more economic benefits in the long run
- More trade liberalization can increase TPP's growth rates also
- Same things happen in Korea: Elimination of tariffs \Rightarrow demand for capital $\uparrow \Rightarrow$ rental and ROR $\uparrow \Rightarrow$ more investment (investment inflow from global Trust)

Korea's qgdp

TPP and PTPP's qgdp

	POLICY 2			POLICY 3	
	2020	2025	2030	2025	2030
KOR					
wqh	0.73	0.61	0.51	2.29	2.59
wqhf	1.62	2.46	2.7	4.71	7.31
wqht	-1.21	-2.15	-1.93	-1.45	-2.99
wqtf	1.65	2.5	2.74	4.77	7.42

	POLICY 2			POLICY 3	
	2020	2025	2030	2025	2030
KOR					
qcgds	5.05	4.87	3.42	11.58	13.37
qk	0.72	1.92	2.49	1.46	4.37
rental	1.94	0.82	0.05	5.77	4.04
rorge	0.32	0.27	0.03	0.83	1
rorga	1.03	0.28	-0.16	2.48	1.18

Note: all variables are evaluated based on difference between Policy and Base

III Looking deeper into impact of POLICY 3

Korea Institute for International Economic Policy

➤ Welfare decomposition

	alloc	endwNA; tech; pop; pref	tot	IS	nf_equit	Total
KOR	12,065	0	11,718	-2,383	2,581	23,981
TPP	15,623	0	25,127	378	6,016	47,144
PTPP	40,608	0	21	257	2,151	43,037
EU	-12,250	0	-9,938	203	967	-21,019
ROW	-22,092	0	-27,252	-5,645	-1,785	-56,773

Note: Base assumes the enforcement of TPP between 2016 and 2020.

Policy includes Kor and PTPP's participation in TPP between 2021 and 2025.
